#### PREFACE

This report is one in a series on Soviet Ground Force and Logistic Installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IPIC (DPA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POW storage areas, (H) other buildings and facilities, (J) equipment storage maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

#### SUMMARY

A military training area is located 16 kilometers (km) southeast of Tyumen and five km northeast of Borovskiy (Figure 1). It covers an extensive area around the northern shore of Andreyevskoye Lake. The installation is not rail served, but a number of probable hard-surface secondary roads connect the installation with the Sverdlovsk-Omsk rail line and Tyumen.

The training area covers approximately 2,700 acres and contains an apparently abandoned barracks area, two tank assault-gun firing ranges, three secured storage areas, an administra-

tive barracks area and a probable maintenance support area. The installation contains a total of 80 buildings including 34 adminis-  
barracks, 18 support, 24 general storage and four maintenance storage buildings.

The latest available photography in [REDACTED] indicates little activity within the installation. There has been no apparent change in the installation since the original coverage in [REDACTED]

The installation was covered by [REDACTED] KEY-  
HOLE missions between [REDACTED]

#### DESCRIPTION OF INSTALLATION

##### Road Service

Probable hard-surface secondary roads serve the installation and link it to the Sverdlovsk-Omsk rail line.

##### Administrative and Troop Housing Areas

Area D1 contains 33 administration buildings, barracks and three support buildings.

Area D2 contains one administration building and eight support buildings. The area is probably a former barracks bivouac site.

##### General Storage Areas

Areas E1, E2, and E3, all secured, contain 10, six, and eight general storage buildings respectively.

##### Equipment Storage/Maintenance Area

Area J, secured, contains four probable 200- by 65-foot maintenance storage buildings and seven probable general support buildings.

##### Tank/Assault Gun Firing Ranges

Area N1 is a 4,320-foot range with three 2,790-foot lanes and moving targets.

Area N2 is a 2,700-foot range with four 2,160-foot lanes and moving targets.

Coverage in [REDACTED] indicates no apparent activity on either range.

##### Unidentified Facilities or Tracking Activity

Area I1 appears to be an area from which buildings have been removed.

Area I2 appears to be an old maneuver area.
